

# Assignment 1: Introduction

Sara Sayed

## OVERVIEW

This exercise accompanies the introductory material in Environmental Data Analytics.

## Directions

1. Change “Student Name” on line 3 (above) with your name.
2. Work through the steps, **creating code and output** that fulfill each instruction.
3. Be sure to **answer the questions** in this assignment document.
4. When you have completed the assignment, **Knit** the text and code into a single PDF file.
5. After Knitting, submit the completed exercise (PDF file) to the dropbox in Sakai. Add your last name into the file name (e.g., “Salk\_A03\_Introduction.Rmd”) prior to submission.

The completed exercise is due on <>.

## 1) Discussion Questions

1. What are your previous experiences with data analytics, R, and Git? Include both formal and informal training.

Answer: I took ENV 710 last year which was my first experience with R. Other than that I took Advanced GIS last semester where we learned Python and used Git a bit.

2. Are there any components of the course about which you feel confident?

Answer: I think I feel confident about ggplot??

3. Are there any components of the course about which you feel apprehensive?

Answer: I haven't used R since fall 2019 so I hope I remember enough of the basics.

## 2) GitHub

Provide a link below to your forked course repository in GitHub. Make sure you have pulled all recent changes from the course repository and that you have updated your course README file.
